About TX-ESC

The Energy Services Coalition offers public and private agencies a unique opportunity to collaborate, innovate, and achieve their energy efficiency objectives effectively. Through knowledge sharing, resource optimization, and collaborative networking, ESC empowers public agencies to lead in sustainable practices, realizing both immediate and long-term benefits for their communities.

- **Collaborative Networking:** Foster connections with peers, industry leaders, and experts, facilitating information sharing, peer-to-peer learning, and the establishment of valuable partnerships.

- **Policy and Regulatory Guidance:** Access insights on evolving energy policies and regulatory frameworks, helping agencies navigate compliance requirements and reduce regulatory risks.
- **Knowledge Exchange:** Access a platform for sharing and acquiring expertise in energy performance contracting (EPC) and other innovative financing mechanisms.
- **Best Practices:** Learn from successful projects, gaining insights into proven strategies and best practices for optimizing energy efficiency.
- **Technology Insights:** Stay informed about the latest advancements in energy-efficient technologies, ensuring agencies deploy cutting-edge solutions aligned with sustainability goals.
- **Advocacy:** Join a collective voice advocating for energy efficiency at a regional, national, and international level, influencing policies and creating a supportive environment for sustainable practices.

Joining the TX-ESC

Informative and interactive Chapter meetings at various locations across the state provide a forum to address performance contracting issues and to develop business relationships.

Workshops on project development, financing, and energy savings performance contracting provide information on the programmatic process, as well as new energy-saving technologies and financing options for building and facility owners.

Other benefits available to ESC members include: problem-solving services on performance contracting and financing for building and facility owners, and free educational and technical materials, including standardized documents, such as sample Requests for Proposals and contracts.
